SWEDSTYLE

Stockholm Furniture Fair®

Invitation

Office technology the Swedish way

What do you think the office of the future will look like? At Swedstyle, we develop office technology that is easy to understand and easy to use. We get our inspiration from the world around us, where new ways of working and new digital advances offer new possibilities. At the Stockholm Furniture Fair, we would like to invite you to come and discuss with us the smart, simple solutions of the future and get your take on what the future might hold.

We extend a warm welcome to you to come and visit stand A37:10.

Two companies – one brand

Swedstyle and JG Metall are two companies which together have more than 30 years' experience in developing smart office solutions. Now we are combining our expertise – from 2018 the companies will be trading under the joint Swedstyle brand. We look forward to being able to grow still stronger together!

Unique lock system for all interior fittings

A particular area we have focused on and developed is that of lock solutions, with our universal lock FlexLOCK. FlexLOCK is a flexible and secure lock system, easy to use and easy to integrate in those items of furniture you want to be able to lock. It is above all designed to be user-friendly and has some smart functions that are completely unique to it.

FlexLOCK
